PROFILE SUMMARY

Senior Frontend Developer with 6 years of experience building scalable, high-performance web applications using React.js, Next.js, TypeScript, and the MERN Stack, with working exposure to C#, .NET Core, and Azure-based deployments. Currently serving as Tech Lead at Progcap, owning the full frontend architecture of an Admin Portal and B2B Storefront — from design systems and state management to API integration, performance optimization, and code reviews. Skilled at translating complex business requirements into clean, maintainable, and reusable component architectures, and at leveraging AI-assisted development tools (Claude, ChatGPT, Copilot) to accelerate delivery without compromising code quality. Proven ability to mentor developers, drive engineering best practices, and collaborate closely with product, design, and backend teams to deliver pixel-perfect, production-grade UIs at scale.

TECHNICAL SKILLS

Front-End: React.js, Next.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, MUI, Tailwind CSS, Design Systems, Performance Optimization

Back-End: Node.js, Express.js, C#, .NET Core, ASP.NET MVC, RESTful APIs, Microservices, JWT, OAuth

Database: MongoDB, MySQL, Firebase, SQLite, Supabase

Cloud & DevOps: Microsoft Azure, CI/CD Pipelines, Application Monitoring & Deployment

Leadership & Tools: Tech Leadership, Code Review, Mentoring, Git/GitHub, Agile, API Integration, Cross-Functional Collaboration

AI Tools: AI/LLM Prompt Engineering, Claude, ChatGPT, GitHub Copilot - AI-assisted development & code review

WORK EXPERIENCE

Frontend Tech Lead (Full Stack Developer)

Sep 2022 - Present

Progcap, New Delhi

- Led frontend architecture for ProgSense and ProgCommerce (B2B fintech platform - progcomm.ai), serving multiple enterprise clients.
- Single-handedly built and owned the Admin Portal UI end-to-end — React.js, reusable components, clean state management, and scalable folder structure.
- Drove Storefront Web & App frontend development with consistent design system, responsiveness, and performance across devices.
- Integrated RESTful APIs and microservices with the frontend, ensuring secure auth flows (JWT/OAuth) and reliable data handling.
- Set frontend coding standards, led code reviews, and mentored developers on React best practices and component reusability.
- Collaborated closely with product managers, designers, and backend engineers, and adopted AI-assisted tools (Claude, ChatGPT, Copilot) to speed up delivery.

Software Engineer

Mar 2021 - Jul 2022

Baar Technology, Kolkata | Client: Aditya Capital (ABC)

- Built frontend modules for 3 enterprise products — HRMS Portal, IGA Toolkit (BAAR-IGA), and internal tools using React.js & MUI.
- Developed reusable UI components, integrated REST APIs for HR and identity governance workflows, and worked closely with QA to resolve production issues.

Software Engineer

Apr 2020 - Feb 2021

LrnEd, New Delhi

- End-to-end development of an HR & Operations Portal and an E-commerce Platform using React.js, MUI & MERN Stack, including RESTful API design in Node.js/Express.js.

Software Developer Intern

2018 - 2019

Asian Institute of Technology, Bangkok, Thailand

- 1-month intensive program — built responsive web interfaces and collaborated with a cross-cultural international team, gaining early exposure to agile workflows.

EDUCATION

B.Tech, Computer Science & Engineering

2016 - 2020

JIS College of Engineering, Kalyani | GPA: 85.90 | Languages: English (Professional), Hindi (Professional)
